Dave Doyle
NGS Chief Geodetic Surveyor (Retired)

Interpreting NGS/CO-OPS Control Data Sheets

This presentation describes all of the data elements found on standard National Geodetic Survey (NGS) passive and active control datasheets as well as tidal bench mark sheets published by the Center for Operational Oceanographic Products and Services (CO-OPS). Data defining current and superseded horizontal and vertical survey control, positional accuracy, model geodetic elements (e.g. Geoid Height, Laplace Corrections, etc.) and description information will be discussed in detail.
